

Coaxial cable suspension system in a random configuration.

Coaxial cable will come in bags labeled with length in mm.

Suspension cable comes in 3m increments which are site adjustable. The length should be adjusted on-site to match to the length of the coaxial cable.

Measuring Tips:

1. Determine maximum drop. Measure from ceiling (NOT away from floor).
2. Determine L x W install dimensions.
3. Provide overall height of the room.
4. Provide hand sketch of ideal distribution.
