

GENERAL GUIDE

Length range recommended, see specific specification for each fixture.

Longest length
 Measure from underside of the pendant
 Up to 3000mm standard
 Up to 30500mm custom

100 series uses a sculptural cable suspension system in a cluster configuration.

This series is a departure from other Bocci fixtures where pendants are designed to nestle together, rather than spread across a vertical range. Length ranges are recommended for each fixture to achieve the intended overall form. Deviation from this suggested range will not resemble product photography or drawings. Specify only the longest pendant.

Drop lengths are supplied in clustered lengths within the range specified. Pendants should be touching or nestled closely together while composing the installation.
